Nuclear Regulatory Commission

agencies applicable to exports or imports under their authority.

[49 FR 47198, Dec. 3, 1984, as amended at 58 FR 13003, Mar. 9, 1993; 65 FR 70290, Nov. 22, 2000; 75 FR 44087, July 28, 2010]

§ 110.11 Export of IAEA safeguards samples.

- (a) A person is exempt from the requirements for a license to export special nuclear, source, and byproduct material set forth in sections 53, 54d, 64, 81 and 82 of the Atomic Energy Act and from the regulations in this part to the extent that the person exports special nuclear, source, or byproduct material in IAEA safeguards samples. The samples must be exported in accordance with §75.8 of this chapter, or a comparable U.S. Department of Energy order, and:
- (1) For special nuclear material, be in quantities not exceeding a combined total of 100 grams of contained plutonium, uranium-233, and uranium-235 per facility per year;
- (2) For source material, be in quantities not exceeding 5 kilograms per facility per year; and
- (3) For byproduct material, be in quantities not exceeding the values in §30.71 of this chapter per shipment.
- (b) This exemption does not relieve any person from complying with parts 71 or 73 of this chapter or any Commission order under section 201(a) of the Energy Reorganization Act of 1974 (42 U.S.C. 5841(a)).

Subpart C—Licenses

SOURCE: 49 FR 47198, Dec. 3, 1984, unless otherwise noted.

§110.19 Types of licenses.

Licenses for the export and import of nuclear equipment and material in this part consist of general licenses and specific licenses. A general license is effective without the filing of an application with the Commission or the issuance of licensing documents to a particular person. A specific license is issued to a named person and is effective upon approval by the Commission of an application filed pursuant to the

regulations in this part and issuance of licensing documents to the applicant.

[75 FR 44087, July 28, 2010]

§110.20 General license information.

- (a) A person may use an NRC general license as authority to export or import nuclear equipment or material, if the nuclear equipment or material to be exported or imported is covered by the NRC general licenses described in §§110.21 through 110.27. If an export or import is not covered by the NRC general licenses described in §§110.21 through 110.27, a person must file an application with the Commission for a specific license in accordance with §§110.31 through 110.32.
- (b) In response to a petition or on its own initiative, the Commission may issue a general license for export or import if it determines that any exports or imports made under the general license will not be inimical to the common defense and security or constitute an unreasonable risk to the public health and safety and otherwise meet applicable statutory requirements. A general license is issued as a regulation after a rulemaking proceeding under subpart K of this part. Issuance of a general license is coordinated with the Executive Branch.
- (c) A general license does not relieve a person from complying with the regulations of other Government agencies applicable to exports or imports under their authority.
- (d) A general license for export may not be used if the exporter knows, or has reason to believe, that the material will be used in any illegal activity or any activity related to isotope separation, chemical reprocessing, heavy water production or the fabrication of nuclear fuel containing plutonium, unless these activities are generically authorized under an appropriate agreement for cooperation.
- (e) A person who uses an NRC general license as the authority to export or import may cite on the shipping documents the section of this part which authorizes the described export or import under general license, as a means of expediting U.S. Customs Service's processing of the shipment.
